Summary Statistics by Conflict Intensity

Variable	War-Based Split		Casualty-Based Split	
	Low	High	Low	High
Sample Size	68939	21170	68386	21723
Outcome Variables:				
International Migrant (%)	10.8 (31.04)	11.03 (31.33)	10.65 (30.85)	11.5 (31.91)
Currently Abroad (%)	8.3 (27.58)	8.27 (27.54)	8.12 (27.32)	8.81 (28.35)
Return Migrant (%)	2.94 (16.89)	3.25 (17.74)	2.96 (16.95)	3.17 (17.52)
Conflict Exposure:				
Months of War	45.73 (9.28)	79.08 (9.97)	46.22 (10.28)	76.69 (12.73)
Casualties	165.89 (69.1)	501.07 (172.74)	161.25 (61.11)	507.15 (159.49)
Treatment Distribution:				
Treatment Cohort (%)	73.31	75.59	73.24	75.76
Demographics:				
Age in 2017	28.01 (19.57)	26.68 (18.95)	28.07 (19.58)	26.54 (18.93)
Male (%)	51.42	50.65	51.47	50.52
Education Distribution (%):				
No Education	2.39	3.58	2.31	3.82
Primary (1-5)	35.23	37.68	35.15	37.9
Secondary (6-12)	57.1	55.42	57.29	54.87
Tertiary	5.28	3.31	5.26	3.41
Ethnicity Distribution (%):				
Hill High Caste	34.21	45.77	33.63	47.3
Hill Janajati	30.56	17.29	31.38	15.05
Terai/Madhesi	17.27	19.18	17.44	18.58
Dalit	13.62	17.28	13.18	18.58
Muslim	4.35	0.49	4.38	0.5

Note: Standard deviations in parentheses. War-based split uses 75th percentile of months of war. Casualty-based split uses 75th percentile of casualties. Both splits define Low Conflict (at or below Q3) vs High Conflict (above Q3).
